

Hi, everyone! It was a pleasure speaking to you on Thursday. As mentioned, here are some relevant links you might want to check out.

Space Generation Advisory Council:

<http://spacegeneration.org/>

SGAC Norway:

<http://www.spacegeneration.org/zh/sgac-region/europe/norway.html>

We also have a Norwegian SGAC mailinglist, where anyone can join and receive info about relevant events, courses, internships or other possibilities in the space sector. You can sign up on the mailinglist by joining this Google group:

<https://groups.google.com/a/spacegeneration.org/forum/?hl=en#!forum/norway>

International Space University:

<http://isunet.edu/>

Norwegian Space Centre's info about the ISU Space Studies Program:

<http://www.romsenter.no/Vi-hjelper-med/Stipend-og-studier/ISU-Sommerkurs>

Space Generation Congress:

<http://spacegeneration.org/event/sgc.html>

International Astronautical Congress:

<https://www.iac2016.org/>

SpaceUp:

<http://spaceup.org/>

I would really like to help organize the first SpaceUp Norway during the spring, but it's a bit too ambitious for one person alone. If anyone thinks this sounds interesting and would like to join an organizing team, I would be very happy to hear from you (no commitment at this stage).

Would also recommend exploring the website of the Norwegian Space Centre, especially the section about scholarships and studies:

<http://www.romsenter.no/nor/Vi-hjelper-med/Stipend-og-studier>

The Alpbach Summer School might be especially relevant:

<http://www.romsenter.no/Vi-hjelper-med/Stipend-og-studier/Sommerskolen-i-Alpbach>

My Facebook page about space:

<https://www.facebook.com/romstasjon1/>

Sorry that some of these are only in Norwegian. For exchange students, I would recommend contacting your SGAC National Point of Contact for more info about the possibilities in your country. A list of all NPoCs can be found here:  
<http://spacegeneration.org/about/sgac-team.html>

That's it for now, and if you have any questions, please don't hesitate to contact me at [petter.skanke@spacegeneration.org](mailto:petter.skanke@spacegeneration.org). In general, there are more opportunities and more going on in the space sector than most people are aware of. It's a relatively small industry filled with some of the coolest and most visionary people on the planet. Hope to see many of you again at space events and somewhere in the space sector. We seem to be in for a space revolution over the next decades, so it's truly an interesting time to be alive! Reach for the stars!

Best regards  
Petter Evju Skanke
